Entered at the postoffice in Tonopah as second class matter

Democratic newspapers have nothing more to say about the president and his administration. The space usually devoted to that class of stuff is taken up with Tabbies ads.

LOWDEN'S PLATFORM.

Governor Lowden blames much of the unrest and lousy living on the high taxes—federal, state and local. The excess profits taxes taken by the government spread out into almost every conceivable transaction. The administration speaks carelessly of billions and then reaches out with steel fingers to seize them and use whole subscription of funds starts out from an unnatural and extravagant basis. For two successive years Governor Lowden managed to reduce the tax rate in his own state in spite of the heavy cost of materials and urgent needs. This has been a great stabilizer in business and has been a wholesome stimulant to population. No other state in the union was able to bring about a reduction and Governor Lowden feels that no great progress can be made in saving money and reducing costs until the people's government does a little promoting along those lines.

Among other economies effected, Governor Lowden swept out the one hundred and twenty-five bureaus and commissions which cluttered the state government and established in their place nine efficient and well organized departments. He provided, through legislation, for the adoption of a state-wide system of hard roads without any expense to the taxpayer. He also worked out a satisfactory plan for a deep waterway which will afford a cheap freight medium between Chicago and the gulf.

MARKET FOR ZINC ORES.

Nevada is promised a new outlet for its zinc ores, which have been penalized by the long haul to Kansas and Wisconsin smelters through the construction of a plant at Murray designed for treating zinc oxide ores. While the plant is designed primarily to treat a large tonnage from the Tonopah district in Nevada about three miles from the station of Tonopah on the Southern Pacific, it is probable that other ores will be treated and that the zinc producers of southern Nevada will be benefited by the installation. The plant is owned jointly by officers of the Western Metals company, which is one of the largest buyers of zinc ores in the west and, as such, the company is ready to receive shipments of zinc ores of the character in which the company will specialize. There are large deposits of zinciferous ores in many of the old mines which are now reopening and disposition of a market near home will add further stimulus to mining in Nevada.

Some years ago mining in the Lone Mountain district began shipping zinc ores to Mineral Point, Wis., but after standing the heavy freight to that distant point the production had to cease as nothing remained for the shipper to repay him for his investment. Other properties in the vicinity of Tonopah would find an incentive to develop on an extensive scale if once assured of a market and when these companies have a reasonable assurance that they can dispose of their refractory product they will press the work of development so that they will be in the running by next fall, when the new plant will be completed.

COAL, PHOSPHATE AND SODIUM.

Further perusal of the new leasing bill in the hands of the president for his approval discloses that the terms upon which coal lands can be leased are that the land be subdivided into leasing tracts of forty acres each or multiples thereof. In no case will any leasing tract contain more than 2500 acres. Leases are to be awarded by competitive bidding. Where prospecting or exploration is necessary to determine the existence of coal deposits the secretary of the interior may issue a prospecting permit for a term of two years for not exceeding 2500 acres and of within that period the permittee shows that the land contains coal in commercial quantities, he is entitled to a lease.

No lease of coal land is to be approved until after a notice has appeared for thirty days in a newspaper of general circulation in the county in which the land or deposits are situated. There is also a provision that no mineral shall be permitted to hold a lease to mine coal on the public domain except for its own use and no railroad company. No more than one permit or lease for each 200 miles of the railroad line within the state where the coal land is situated. The royalty is to be not less than five cents a ton payable at the end of each third month and an annual rental of such rate may be fixed by the secretary of the interior, not to be less than 25 cents in the first year, not less than 50 cents an acre for the second, third, fourth and fifth years and not less than \$1 an acre for each year thereafter during continuation of the lease.

Leases are to be for intermediate periods on condition of diligent development and continued operation of the mine except where operation shall be interrupted by strikes. At the end of each twenty-year period the secretary of the interior may require a readjustment of terms and conditions.

Phosphates and oil shale and sodium are to be taken from the public domain on the same general terms that apply to coal and oil and gas. Each lease is to be for twenty years and not to exceed 2500 acres.

FOREIGN EXCHANGE.

The Wall street panic in foreign exchange is disturbing because of the sympathetic decline in securities, yet if there shall be a sympathetic fall in prices of securities results may prove a blessing in disguise.

It is difficult for the average citizen to comprehend the technicalities of foreign exchange, but one would think the foreign customer who uses the buying power of his money out one-third would diminish his purchases in the American market. He may continue to buy the goods he is in urgent need of, but it would seem imprudent for him to buy a penny's worth that he can do without. And as for the foreigner whose money is out two-

thirds of its value, like the franc, he can't afford to buy much of anything here, no matter how much he may need it.

If these countries curtail their purchases in our market it is reasonable to presume that our own people, who are confronted with the problem of providing food for their households with limited incomes, may begin to see a glimmer of hope in the crash of foreign exchange.

If severe breaks in foreign exchange shall result in food supplies being kept at home for a season and if wheat and corn, butter and eggs, and provisions shall drop along with the English pound, the French franc, the Italian lire and the German mark, the old law of supply and demand may prove a godsend to the consuming public. Then when normal prices obtain again perhaps some plan may be evolved for recapturing the foreign trade without their being compelled to pay spot cash, which seems to be the bottom of the present difficulty.

TWIN TUNNELS TO HOLD TRADE

PITTSBURGH, Feb. 25.—Twin tunnels, each 5,700 feet long, for the use of vehicles and pedestrians, are being bored through the range of hills bordering the southern side of the Monongahela river valley here, in order that the thousands of persons who live in the southern part of Allegheny county and work in Pittsburgh may more easily reach the city.

Work on the tunnels, which began a few days ago, will continue for more than two years, engineers estimate and the cost will be \$4,500,000.

It is proposed to have the tunnels connect with a high bridge which will span the Monongahela river and bring the tunnel traffic to the heart of the business district of Pittsburgh. This will cost \$2,500,000. Each tube will be made to accommodate two lines of vehicle traffic, and in addition there will be foot paths.

MORGANATIC UNION BROUGHT TO LIGHT

(Correspondence Associated Press) LONDON, Feb. 5.—Referring to a New York dispatch printed here to the effect that William Fitzherbert, who died at Brooklyn, claimed to be a great-grandson of King George IV by his marriage with Mrs. Fitzherbert, and as such entitled to large estates, the Daily News says: "Whatever the facts about the marriage, there is no doubt that Mrs. Fitzherbert believed herself to be lawfully married to George IV. It has always been understood that she died childless."

Prospectors may find those popular triplicate location certificate books at the Bonanza office.

SCOTCH OPPOSED TO SUNDAY WORK

(Correspondence of Associated Press) LONDON, Feb. 9.—Lord Leverhulme has encountered the religious prejudices of the Scotchmen who live on the extensive property he has purchased in the Outer Hebrides and has suffered a rebuff. He had planned to make Stornoway, on the island of Lewis, the headquarters of a huge fishing fleet that should sweep the seas for 500 miles around. The project involved Sunday labor and the islanders who adhere to the strict and intense form of the Presbyterian faith, rejected it.

Commenting on the incident, the periodical, Common Sense, says: "Lord Leverhulme is a man of big ideas and new ideas while the population over whom he has declared the rights of lordship are folk of old and intense ideas. Hence the inevitable collision."

LAST OF ENGINES.

(Correspondence of Associated Press) LONDON, Feb. 9.—The last horse-drawn fire engine remaining in London has been offered to the South Kensington Science museum.

Different Colors of Paper

Many business men have a system of using different colors of paper for different printed forms, thus distinguishing each form by its color.

We can work this system out for you, using

HAMMERMILL BOND

the Utility Business Paper, and you will find that it saves you time and money.

Let us show you the advantage of standardizing your paper and your printing.
